Projects

Java Swing Application to automate business process for My Share   2023
(Java, MySQL, IntelliJ)
As part of my campus project, I developed a Java Swing Application for stock management for My Share. This project involved designing and implementing an intuitive user interface and backend logic to efficiently manage and automate stock-related processes

Android Application - MyNote   2023
(Java, Firebase, Android Studio)
This Project is Android Note Application, this App can create Note, Delete & Edit. Also, I provide Signup in Sing in with Email verification. And we also use Firebase & Fire Auth. In advantage of that, users can save their note in cloud an access the Note Anywhere & Anytime.

Computer Repair Website to PC-Mart   2024
(React, Spring boots)
Full Stack Website for PC Mart. In this Project I implement Repair Request Page, Home Page, Contact Page and also Admin Dashboard to Manage the Repair Request

Website For Nisha Electricals   2024
(HTML, CSS, PHP, Js)
An E Commerce Website of Nisha Electrical store. Located in Koswaththa, Sri Lanka. The objective was to do operation Online. Including products selling, Stock Management , Admin Dashboard & Report Generation

Research about Youth and Financial Literacy   2023
(Rstudio, Ms Form, Ms Excel)
Conducted research on financial literacy among youth, examining their understanding of key financial concepts, spending habits, and saving behaviors. The study highlighted gaps in knowledge and identified factors influencing financial decision-making. Recommendations were provided to enhance financial education programs and empower young people to make informed financial choices.

Security Vulnerability Assessment for Nisha Electrical Koswaththa
·Identified vulnerabilities in physical, operational, and system configurations. Provided actionable recommendations to mitigate identified security risks.
